

# Wiktor ZIEJEWSKI

1996

I'm just starting my adventure with #tech industry - and I don't have much experience - but I'm willing to learn and become better. Few months ago I finished a front-end course at Kodilla where I learned HTML CSS JavaScript and React. I'm also familiar with how some of the project's processes look like ( I worked with Jira and I know basics of Agile / SCRUM). I'm looking for a place that will help me to grow, ad help me discover my own path - as a FE developer, tester or maybe other role - I'm open for multiple options.

## Skills

- HTML, CSS, RWD

- JavaScript, React

- Jira, Agile / SCRUM
